

KRATI JADAUN

Data Analyst | Business Systems Analyst II | KPI Reporting & Dashboard Automation | SQL, Python, Tableau, Power BI

Kratijadaun@gmail.com | (603) 438-6344 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience. Builds SQL and Python ETL pipelines, governed data models, and automated business intelligence dashboards in Tableau, Power BI, and Incorta that cut manual reporting and speed decisions.

EXPERIENCE

Business Systems Analyst II (Data Analyst), *RealCold - Lakeland, FL*

Jan 2026 – Aug 2026

- Engineered SQL and Python ETL pipelines across 5+ sources - Extensiv WMS/OMS, Blue Yonder WMS, Sage, SharePoint, and inventory snapshots - reducing manual reporting by 20% and improving reporting accuracy by 10%
- Partnered directly with key repeat accounts, including Coca-Cola, writing custom SQL queries to pull and transform data into tailored Power BI (DAX, Power Query/M) dashboards that improved reporting transparency and strengthened client retention
- Spearheaded foundational data ecosystem and governance across 5+ teams by defining source-to-KPI mappings, dataset grain, joins, validation rules, and ownership for 10+ logistics KPIs
- Architected live, automated Incorta dashboards for occupancy, pallet flow, throughput, delayed deliveries, e-commerce orders, and revenue, expanding live KPI coverage by 30% for 20+ operational and executive stakeholders
- Managed the full analytics lifecycle for 5+ production dashboards, from requirements and data cleaning through QA, user acceptance testing (UAT), deployment, and adoption, raising SOP adherence by 15% and saving 45 hours weekly
- Translated ad hoc requests from 20+ stakeholders into site, customer, and unit-level analyses that supported labor and pricing decisions across 5 functions and reduced turnaround time by 20%
- Delivered a dual-track BI architecture, building internal Incorta dashboards for real-time operational visibility while engineering SQL-driven Power BI dashboards for external, customer-facing reporting

Data Analyst, *Northeastern University - Boston, MA*

Jan 2025 - May 2025

- Built SQL cohort datasets and segmentation logic, reducing analyst effort by 42% and improving engagement forecast accuracy by 25%
- Automated Python EDA and recurring analysis workflows using Pandas, reducing the reporting cycle from 6 hours to 45 minutes
- Designed interactive Tableau dashboards using a STAR schema with 80+ tables to analyze 100+ NAICS sectors and strengthen business-driven storytelling
- Conducted variance analysis and KPI reporting that uncovered \$5.3M in funding gaps, informing a 17% budget reallocation across priority programs
- Performed Python statistical and ad hoc analysis with data cleaning and validation, identifying \$430K in contractor savings and improving resource planning

Data Scientist, *RadicalX - New York, NY*

Jul 2024 - Nov 2024

- Developed and evaluated 15 machine learning models through 10+ experiments using Python, Scikit-learn, and XGBoost, improving model performance by 15% and user satisfaction by 20%
- Streamlined end-to-end model deployment using Git, Flask, and Docker within a 5-person team, reducing deployment time by 30% and improving production reproducibility
- Collaborated with AI researchers and engineering teams to refine GPT-4 agent behavior and inference workflows, improving model precision and system responsiveness by 10%
- Executed large-scale A/B testing and causal inference analysis that selected the production model, delivering performance gains of 10-18% across key user segments

Data Analyst, *Grand Excelsior Hotels - Dubai, UAE*

Jun 2019 - Apr 2020

- Built ETL reporting pipelines across 3 operational sources, integrating CRM, booking, and service log data while reducing reconciliation time by 30%
- Segmented 50K+ guest profiles using K-Means clustering and cohort analysis, generating targeted customer insights that increased campaign effectiveness by 11%
- Delivered Power BI dashboards across 5+ properties, consolidating occupancy, turnaround, and satisfaction KPIs while reducing manual reporting by 40%
- Produced recurring KPI analysis across 15+ operational metrics for non-technical stakeholders, reducing guest check-in delays by 20%; named Employee of the Month four times

EDUCATION

Master of Professional Studies (MPS) in Analytics | *Northeastern University - Boston, MA*

Jul 2023 - May 2025

Relevant Coursework: Machine Learning, Algorithms, Data Management & Warehousing, BI & Data Visualization

SKILLS

Analytics & BI	Python, SQL, R, SAS, Excel, Tableau, Power BI, Incorta, business intelligence, data visualization
Data Engineering	ETL and ELT, data warehousing, data modeling, data quality & governance, Snowflake, MySQL, Azure
Analysis	KPI design, EDA, statistics, A/B testing, forecasting, regression, cohort analysis, requirements gathering
Systems & Delivery	Extensiv, Blue Yonder WMS/OMS, Sage, SharePoint, Salesforce, SAP, JIRA, Git, Docker, Agile
