EXPERIENCE

Business Systems Analyst II | Data Analyst, RealCold — Lakeland, FL Jan 2026 - Present

- Architected live, automated Incorta dashboards for occupancy, pallet flow, throughput, delayed deliveries, e-commerce orders, and revenue, increasing data availability 30% for 20+ operational and executive stakeholders.
- Engineered SQL and Python ETL pipelines across 5+ sources - Extensiv WMS/OMS, Blue Yonder WMS, Sage, SharePoint, and inventory snapshots - reducing manual reporting 20% and improving reporting accuracy 10%.
- Spearheaded foundational data ecosystem and governance across 5+ teams by defining source-to-KPI mappings, dataset grain, joins, validation rules, and ownership for 10+ logistics KPIs.
- Managed the full analytics lifecycle for 5+ production dashboards, from requirements and data cleaning through QA, deployment, and adoption, raising SOP adherence 15% and saving 45 hours weekly.
- Translated ad hoc requests from 20+ stakeholders into site-, customer-, and unit-level analyses that supported labor and pricing decisions across 5 functions and reduced turnaround time by 20%.

Data Analyst, Northeastern University — Boston, MA Jan 2025 - May 2025

- Designed interactive Tableau dashboards using a STAR schema with 80+ tables to analyze 100+ NAICS sectors and strengthen business-driven storytelling.
- Conducted variance analysis and KPI reporting that uncovered \$5.3M in funding gaps, informing a 17% budget reallocation across priority programs.
- Automated Python EDA and recurring analysis workflows using Pandas, reducing the reporting cycle from 6 hours to 45 minutes.
- Performed Python statistical and ad hoc analysis with data cleaning and validation, identifying \$430K in contractor savings and improving resource planning.
- Engineered SQL cohort datasets and segmentation logic, reducing analyst effort by 42% and improving engagement forecast accuracy by 25%.

Data Scientist, RadicalX — New York, NY July 2024 - Nov 2024

- Engineered and evaluated 15 machine learning models through 10+ experiments using Python, Scikit-learn, and XGBoost, improving model performance by 15% and user satisfaction by 20%.
- Optimized 7 fine-tuned models using Bayesian optimization and cross-validation, reducing model overfitting by 20% and overall processing time by 25%.
- Streamlined end-to-end model deployment using Git, Flask, and Docker within a 5-person team, reducing deployment time by 30% and improving production reproducibility.
- Conducted large-scale A/B testing and causal inference analysis to measure model impact, identifying performance improvements ranging from 10% to 18% across key user segments.
- Collaborated with AI researchers and engineering teams to refine GPT- 4 agent behavior and inference workflows, improving model precision and system responsiveness by 10%.

Data Analyst, Grand Excelsior Hotels — Dubai, UAE Jun 2019 - Apr 2020

- Architected Power BI dashboards across 5+ properties, consolidating occupancy, turnaround, and satisfaction KPIs while reducing manual reporting by 40%.
- Engineered ETL reporting pipelines across 3 operational sources, integrating CRM, booking, and service log data while reducing reconciliation time by 30%.
- Analyzed 10K+ guest interactions through data cleaning, validation, and root cause analysis, improving the accuracy of operational reporting across 5+ properties.
- Segmented 50K+ guest profiles using K-Means clustering and cohort analysis, generating targeted customer insights that increased campaign effectiveness by 11%.
- Translated 15+ operational KPIs into actionable Power BI insights for nontechnical stakeholders, supporting service improvements that reduced guest check-in delays by 20%.

EDUCATION

Master of Professional Studies in Analytics | Northeastern University, Boston July 2023 - May 2025

Courses: Machine Learning, Algorithms, Data Management & Warehousing, BI & Data Visualization

SKILLS

Analytics & BI	Python, SQL, R, Git, SAS, Excel, Tableau, Power BI, Incorta
Data Engineering	ETL and ELT, data warehousing, data modeling, data quality & governance, Snowflake, MySQL, Azure
Analysis	KPI design, dashboard automation, ad hoc analysis, EDA, statistics, A/B testing, forecasting, regression
Systems & Delivery	Extensiv WMS/OMS, Blue Yonder WMS, Sage, SharePoint, Salesforce, SAP, JIRA, Git, Docker, Agile
